SUMMARY

Dynamic Frontend Developer with 3.5 years of experience at Infosys Ltd., proficient in React-based web and mobile solutions. Skilled in crafting responsive applications, optimizing user experiences, and delivering clean, maintainable code. Experienced in leading teams and solving complex challenges. Committed to evolving into a full-stack MERN developer, honing back-end and unit testing capabilities.

EXPERIENCE

Digital Specialist Developer

Infosys Ltd

📅 10/2021 - Present   📍 Pune

Infosys Ltd. is a multinational corporation that provides business consulting, information technology, and outsourcing services

Quality 360

- **Modernized Legacy Tools** by incorporated a React.js application to replace legacy Windows tools, elevating usability and slashing maintenance costs by 35%.
- **Controlled Efficiency & Performance:** Orchestrated AWS-based test management solutions, improving operational efficiency by 40% and system performance by 20%.
- **Enhanced Authentication Security**: Spearheaded the implementation of a blended Okta SSO solution, streamlining authentication processes and ensuring compliance with industry standards, leading to a 30% reduction in login issues.

DevX Ticket Management System (similar to Jira)

- **Optimized Task Management**: Engineered a ticket management platform with React.js and Node.js, enhancing team task management by 40%.
- **Scalable & Secure Architecture**: Merged Backstage for modularity, reducing complexity by 30%, and implemented RESTful APIs with GitHub Authentication and RBAC for reorganised security and user management.
- **Faster Development & Deploymen**t: Accelerated 30% faster development with Material UI and integrated Azure DevOps APIs to streamline pipeline status analysis for users, repos, and projects, reducing deployment time by 25%.

HBTF - Banking App (Mobile Version) Development

- Pioneered a suite of 10+ reusable React Native components, slashing development time by 20% per sprint and fostering a 30% higher code reusability rate across mobile application projects.
- Optimized application performance within the WaveMaker framework, achieving a 30% speed improvement.

HBTF - Attendance Management System

- **Resolved** UI issues and refined error-handling logic, boosting metric accuracy by 15%.
- Enhanced code structure and reduced load times by 20%, improving system efficiency.

Device Certification Centralization for Rogers Canada

- Created responsive dashboards and advanced data visualizations to streamline certification workflows, improving user interaction and reducing task completion time by 20%.
- Constructed reusable UI components, accelerating development and improving navigation by 20%.

EDUCATION

BTech (Electronics and Telecom.)

MIT Academy of Engineering

📅 08/2016 - 05/2020   📍 Pune

SKILLS

Frontend Technologies: HTML, CSS, JavaScript (ES6 , JSX), React, React-Router, React-Native, Next.js, TypeScript, CSS, Bootstrap, Tailwind CSS, Material UI, Postman, GitHub.

State Management & DataFlow: Redux-Toolkit, Axios, REST API, React-Router,

Security & Deployement: Okta SSO, AWS (S3, CloudFront), CI/CD.

PROJECTS

Blog Post Application

Developed a **blog application** using React.js and Appwrite, with **secure authentication**, **rich text formatting**, and **image upload** features.

- Styled using **Tailwind CSS**, achieving 100**% responsiveness across devices** and ensuring scalability.
- Set the stage for advanced features like categorization and comments with RTE support, cutting 25% future dev time.

To-Do List Application

Built a To-Do List application using React.js and Redux Toolkit for state management.

- **Enhanced a task-tracking solution** by adding features to create, edit, and delete tasks.
- Utilised Tailwind CSS for a polished and responsive user interface.

CERTIFICATION

Frontend Web Developer - Infosys

Covered: HTML, CSS, JavaScript (ES6+), Responsive Web Design, and Bootstrap.
